DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-17 rejected under 35 U.S.C. 103(a) as being unpatentable over Coombes et al or Dorman et al.

3. Applicants urge that the examples of Dorman et al do not employ the claimed polymer which is employed in the instant case. While patentees prefer to use a different related aminoacid ester from that claimed as their protein patentees do contemplate copolymers that are substantially the same copolymer as claimed, note claim 3 of the reference. It would appear that the degree of porosity reached by the process employed in the reference (note col. 7 lines 3-27) would meet the claimed broad limits (instant claim 15).

4. With regard to Coombes et al note that in col.8 lines 1-3, col. 5 lines 38-47, patentees state that they prefer to use the precisely claimed poly(L-lactide) and in example 8 said lactide is used in an example. Furthermore

applicants' argument that patentees merely regard the claimed phosphate as a filler, is not given any weight in view of the fact the claimed calcium phosphate is combined with the instantly claimed L-PLA to produce a microporous product. It is also considered that the degree of porosity is merely a function of the proportions of the ingredients employed. Since the proportions employed are so wide as shown in claim 15, it would appear that the porosity called for in the instant claims would inherently be met by the reference examples. .

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory

period for reply expire later than SIX MONTHS from the mailing date of this final action.
